

We have found a virus that directly interferes with fulfilling your life desires.

We were first surprised to find a virus that caused over 90% of the known (and unnamed) phobias, compulsions and obsessions. The Borna Virus Combination group of remedies has grown to 280+ and continues to prove itself in results.

Next we found a virus that had a strong spiritual connection and interfered with some of our spiritual-related thought processes. The Consciousness Clearing Combinations group is more subtle than the Borna Virus group, but some say their whole life calmed down or cleared considerably with these remedies.

Now we have found a virus that keeps us from connecting to our destiny. We define destiny as the achievement we intended to make when we chose to be born. We call the new group the Destiny Connection Group.

Each discovery stretches our belief structure a little more as to what is possible. This discovery has stretched us so far that we have kept it under wraps for over a full year before announcing it. The group has not been widely tested by people and it does not yet have much results to report. We are encouraged by the initial results.

The remedies are aimed at removing the blocks to what your destiny plans are. You will have to decide if your planned destiny was a good idea.

Usually we made good plans before we came in, whether for happiness or learning or both. The remedies are not something to play around with. Remember the old saying, "Be careful what you wish for . . ." We have multiple people who have thought about the two mate-finding remedies that we currently have and decided not to touch them with a ten-foot pole.

If this kind of anti-connecting virus exists, it helps us all think about what we truly want to be in our destiny. One person started to ask about a remedy that would make him a millionaire. Then he thought about the multiple stories of lotto winners who wrecked their lives with money they were not prepared to handle. What is it you feel belongs in your destiny? We may regret this offer, but let us know and we'll see if we can create a remedy using this virus as the base.

During a class in 2008 a practitioner disclosed that **Spleen Enzyme Alteration - Limbic Joy + Can Love + Limbic Zimbic** had improved the health of a thymus.

A few facts about this group of remedies you should know. The remedies should be taken slowly in standard bottles. They are at 100,000c potency which is the highest potency of any of our current remedies. The higher the potency means the higher level of our being that is reached. It will have strong effects and should not be taken so fast that it scrambles your brain and emotions.

The "Anti-connection virus" is based on the Psorinum miasm. The miasm was called the grandfather of all miasms by the man who discovered miasms, Samuel Hahnemann. To date, no deeper source miasm has been discovered, which means the base of this remedy goes as deep as is currently known.
