

Longevity without health is not a good idea. We are designing remedies only around the issue of improved health that will last longer than current norms. Our goal is 300 years healthy life.

Our bodies seem to be made up of parts with expiration dates. We look for the key to cause expiration of all cells. In the meantime we have found specific answers in specific cells.

## BONES

We have found what appears to be the key cell for all bones and made the revival remedy called **Dry Bones**.

**Marrow Master Cell Regenerate** aims at reviving the marrow which we later found helps the bones as well. Its original design was to help rebuild myosin, ligaments, nerves and endocrine glands.

We also found that the epiphyseal layer of bone that caused our growth of bones in youth causes our knees and rotator cuffs to expire. Correspondingly we made **Knee Knobs** and **Rotator Cuffs**.

The source cell for disks was found and we call the reviving remedy, **Disk Nerve Pressure**. Degeneration of the disks is the cause of "shrinking" in older age plus one of the causes of backaches.

Areas where we feel stiff and "aged" are often in the joints. **Arthralgia Synovial Membrane Regeneration** aims to restore the fluid in joints that keeps the cartilage and bone from deteriorating. It is designed for another part of the bone and fiber that makes that stiff feeling.

## **Chromosome Replication Repair**

As chromosomes replicate, they gradually deteriorate based on age and inheritance. We have found this remedy specifically helpful in early Down's, Down's prevention and incest weaknesses. We see the replication mechanism as part of the "wear out" mechanism of the body. The intention is to restore the chromosome replication process to a fully functional and faithfully dependable avenue of healthful longevity.

## SUMMARY OF REMEDIES

(with range of bottles needed)

### BONES

Arthralgia Synovial Membrane Regeneration	4-6
Arthralgia Reticulum Regeneration	4-6
Disk Nerve Pressure	5-6
Dry Bones	6-8
Knee Knobs	4-6
Marrow Master Cell Regenerate	5-6
Rotator Cuffs	4-6

### CHROMOSOMES

Chromosome Replication Repair	5-6
-------------------------------	-----

### ARTERIES

Capillary Rebuild Endothelium Dysfunction	4-5
Thrombus	4-5

### LYMPH

Lymph Channel Restore Complex	4-5
Spleen Enzyme Alteration Lymph Boost	4-5

### NERVES

Brain Stem Completion	4-5
Crest Regeneration	5
Nerve Source	4-5
Neural Tube Completion	4-6

### THYMUS

Thymus Birthing Disease	4-5
Thymus Build	4-6
Thymus Longevity	5
Thymocyte Regeneration Complex	4-6

## ARTERIES

The interior lining of our arteries is called the endothelium. It appears to also have an expiration date so we made **Endothelium Dysfunction**, using a medical name so that people could research the issue independently. This is most recognized from the aging symptom called purpura, where people bruise at the slightest touch. It was first tested on a man whose forearms were completely purple and oozing in some places. Inside a few months the purple had completely vanished. His bruising became rare and only from substantial blows.

**Capillary Rebuild** helps rebuild capillaries after strokes so that circulating blood reaches all nerve cells. The remedy goes further to restore all capillaries in the body so that all organs receive full nutrition. When capillaries shut down, the memory fades and the skin begins to bruise easily with deteriorated capillaries. (See also Endothelium Dysfunction).

When the endothelium disintegrates into pieces the scientific community calls those pieces "Thrombi" and they call the condition "Thrombosis". To connect the dots, when these thrombi, or broken parts of the endothelium, start floating in the blood they become blood clots. We developed the remedy, **Thrombus**, to dissolve them, but prefer to address the cause.

## LYMPH

Over the years we have developed a number of remedies for lymph repair and lymph nodes/channels repair. Those remedies are presented elsewhere.

We found a way to take a preventative/restorative step in **Lymph Channel Restore Complex**. The remedy is repairing to some degree and restorative by a greater degree. In the most fundamental description, we need to keep these waste removal channels open.

**Spleen Enzyme Alteration – Lymph Boost** revives an almost lost function of the spleen to help lymph removal of toxins and pathogens.

## NERVES

We had to study embryonic growth to find the key to nerves. As the fetus develops it develops what science call the "neural crest" from which all nerves develop. **Crest Regeneration** was made to revive the embryonic cell of nerves so that they last longer. A similar remedy for another form of the neural crest is **Neural Tube Completion** which goes on to develop more than nerves. If the neural tube is not completely developed many nerve weaknesses are created to make us more susceptible to nerve diseases in childhood and adulthood.

In a further step to regenerating nerves and brain cells we made **Brain Stem Completion**. In a nutshell, our nerves do not seem to be fully developed when we are born. The remedy aims to finish the job plus repair the cells that were not fully developed from the beginning. In a similar way, **Nerve Source** seeks to finish the formation of the mesencephalon in the thalamus, the pain center.

## THYMUS

We see the thymus as the key to a number of issues and are still researching the basis of its function. So little seems to be expressed in science about its function that it is almost an orphaned organ. By autopsies they find the thymus begins to grow at age 2 and is considered fibrous, fatty and worthless by age 50. From those findings we can understand why little attention is paid to the thymus.

Yet, the solution to Asperger's, Autism and Alzheimer's come from addressing the thymus. The thymus is essential in baby making. The thymus is thought to be ½ of our immune system. We think this organ has more secrets to yield and are thankful for the answers found so far. To preserve the Thymus we have made **Thymus Birthing Disease** and **Thymus Longevity**. There are other remedies for the healing of the thymus shown elsewhere.

**Thymocyte Regeneration Complex** both repairs problems and rebuilds cells of both the thymus and the liver. **Thymus Build** is designed for thymuses that were not fully developed at birth and for "worn down" thymuses.
